ABSTRACTED-PUB-NO: SU 1526225A

BASIC-ABSTRACT:

Prodn. of staphylococcal bacteriophage of improved quality comprises growing the bacteria in liq. nutrient medium with aeration and stirring for 2.5-3 hrs. until a concn. of 1-1.7 billion cells/ml is reached. Bacteriophage is then added at 1 phage cell/6-7 bacterial cells and the mixt. is incubated for 3-3.5 hrs. then sterilised by filtration through a microporous membrane.

USE - The bacteriophage can be used in medicine and biotechnology.

ADVANTAGE - The bacteriophage show increased activity and yield.
